

The 2019 Chevrolet Silverado/GMC Sierra 1500 trucks begins delivering to dealerships this month. The new truck frame is wider and lower in the front of the truck than the rear. Existing adapters/extended adapters will not work on the recommended front pick-up points. Partnering with GM, VSG developed kit solutions for the flip-up and drop-in adapters for 2-post surface and inground SmartLifts in 10,000 lb. and 12,000 lb. capacities.

GM made a preliminary announcement to dealers indicating wider adapters are required. There will be follow up announcements this week with more details. Expect demand for these to be high.

Utilize the charts below to determine correct adapters kits to order.

#### LIFTS WITH DROP-IN ADAPTERS

ADAPTER KIT NEEDED	LIFT ARM TYPE	LIFT ARM HOLE DIAMETER	WORKS ON ROTARY LIFT MODELS
<b>ROTFJ6257</b>  (2 included)	TRIO	1.5"	SPO10/SPOA10-RA/TA WITH TRIO ARMS SPO12/10-400 SERIES SL210-RA/TA SL212/500-800 SERIES SL212/1100 SERIES
<b>ROTFJ6257</b>  (2 included)	3 stage or 2 stage	1.5"	Revolution R10/RTP10 400 Series Revolution R12/RTP12 300 Series Forward F10/I10 400 Series Forward F12/I12 200 Series
<b>ROTFJ6258</b>  (2 included)	3-STAGE	2"	SPO10/SPOA10-RA/TA With 3-STAGE ARMS SPO12/500-700 SERIES SL210-RA/TA WITH 3-STAGE ARMS SL212/1000 SERIES

The drop-in kits of (2) adapters for the front lift points work with the existing standard adapters in the rear to lift the truck at the recommended pick-up points.

Lifts with flip-up adapters will need the **ROTFJ6259 kit** which include (4) **four adapters**. The kit includes (2) wide front adapters and (2) standard width rear adapters to keep the vehicle level.

#### LIFTS WITH FLIP-UP ADAPTERS

ADAPTER KIT NEEDED	LIFT ARM TYPE	WORKS ON ROTARY LIFT MODELS
<b>ROTFJ6259</b> 	FLIP-UP ADAPTERS	SPOA10/SPO10 SL210-FA ANY ROTARY LIFTS WITH FLIP ADAPTERS
