

**PREPARED FOR AMERICAN HONDA DEALERS**

## **NEW HELI FORKLIFT TO SUPPORT HANDLING OF ELECTRIC VEHICLE (EV) BATTERIES**

### **HELI CPYD32C Cushion Tire Forklift**

- Propane
- 6,500 lbs. base capacity
- 4,630 lbs. capacity @ 36" load center to 150" fork height (adjusted capacity based on specifications)
- 185" triple mast
- Side shifter
- 72" forks
- Cushion tires
- Heli is ranked the 7th largest forklift manufacturer in the World
- Excellent value and performance

#### **Product Features:**

**Less vibration and noise:** The cushion connection and whole suspension cab help absorb the vibration. The fully enclosed dashboard and lowering damping device of the lifting system reduces mast shock and vibration.

**Ergonomic work space:** The operation compartment is large with a heightened overhead guard that has arc shape front legs. The semi-suspension seat, small steering wheel, electro-hydraulic directional control and automobile-type double combined switch help improve the operation comfort.

**Working efficiency:** The forklift has fast lifting speed, good sloping ability and high efficiency. Plus, the small turning radius makes steering flexible and easy.

**Reliability:** The air isolating device, optimized thermal duct and the aluminum plate-fin type radiator improve cooling ability and helps ensure the reliability of the Kubota engine.

**Serviceability:** 80° engine hood open angle makes routine maintenance quick and convenient. There is easy access to the transmission through front floor board.

#### **Safety Features:**

- Blue light (rear mounted)
- Black up alarm
- Amber strobe light
- Orange safety seat belt
