

THE CROWN
ADVANTAGE

CROWN

FC SERIES

PRODUCTIVITY REDEFINED

Take the power and strength to move heavy loads, add faster acceleration and improved travel and lift speeds, and combine it with more runtime and the maneuverability to get into tight spaces, and you'll have the formula to move more loads and improve your performance every day.

Learn how the FC 5200 Series can give your business the Crown Advantage:

Designed for handling Honda lithium batteries in the dealership network:

- 72" Long Forks
- Special fork spread to allow handling of wide lithium battery packaging
- Compact forklift battery design to allow easy maneuvering
- Wide, lugged drive tires for stability and better traction on wet surfaces
- Robust, Crown design for long lasting equipment
- Dual front drive motors which allows for precise, compact turning
- Safety lighting package included (blue floor lights, travel alarm, LED headlights, and flashing strobe)
- Single phase charger to work with existing dealer electrical infrastructure

AC Dual Drive Traction

Dual AC Drives give you the ability to turn the toughest truck in some of the tightest spots and move more loads. Dual AC drives also give you more speed and acceleration.

New Steer Axle Design

A new steer axle design combines the toughness and reliability you expect from a Crown lift truck with maneuverability unlike any other four wheel truck in its class.

eGen® Braking

Practically eliminate maintenance costs with Crown's frictionless eGEN braking system that extends operating time and delivers long lasting reliability.

Intrinsic Stability System

This proactive approach to stability is built into the FC 5200 Series unlike competitive systems which react to unstable conditions.

Comfort and Control

The FC 5200 Series is designed and manufactured to provide operator comfort and precise load positioning for improved productivity.
